

O. P. JINDAL SCHOOL, SAVITRI NAGAR**Periodic Test – I (Round – I) 2025 – 2026****Class: XII****Subject: English****MM: 20****Time: 1 Hr.****General Instructions:**

1. The Question Paper contains THREE sections-READING, CREATIVE WRITING & LITERATURE.
2. Attempt all questions based on specific instructions for each part.

SECTION A- READING**Q1. Read the following passage:**

(1) The term Artificial Intelligence spells a future in which this emerging technology will impact every aspect of human existence. In fact, little do we know, it has already crept into our lives, slowly, but surely. Look around you education, health care, industry, innovation, robots, robotic surgeries, transportation, home service it s already there. It will change the lifestyle of everyone from the technology industry to normal people.

(2) The past fifteen years have seen considerable AI advances in education. You enter school and AI takes your attendance using face recognition. Various applications are in wide use by educators and learners today. AI technologies assist teachers in the classroom. Learning at home is likely to expand significantly, along with learning based on virtual reality applications. Though quality education will always require active engagement by human teachers, AI promises to enhance education at all levels, especially by providing personalization at scale.

(3) The evolution of new technologies, mobile, and the Internet are changing lifestyles. Artificial intelligence is playing an important role in every sector such as banking, driving, education, e-commerce, electronics, and robotics. Systems of artificial intelligence are aiming to stimulate execution and decision-making that is human-like. In targeted applications, substantial increases in the future uses of AI technologies, including more driverless cars, healthcare diagnostics and targeted treatments, and physical assistance for elder care can be expected. AI and robotics will also be applied across the globe in industries struggling such as agriculture, food processing and factories. They will facilitate delivery of online purchases through flying drones, self-driving trucks or robots.

(4) AI-based applications could improve health outcomes and quality of life for millions of people in the coming years prime applications include clinical decision support, patient monitoring and coaching, automated devices to assist in surgery or patient care, and management of healthcare systems. Recent successes, such as mining social media to infer possible health risks, machine learning to predict patients at risk, and robotics to support surgery have expanded a sense of possibility for AI in healthcare.

(5) People s future relationships with machines will become ever more personalized as AI systems learn to adapt to individual personalities, ambitions and goals. These AI applications will help monitor people s well-being, alert them to the impending risks, and deliver services when needed or wanted.
