3. Do not exceed the prescribed word limit while answering the questions.

**SECTION-A ( READING -20 MARKS)****Q1. Read the passage Carefully.****(1x10=10 marks)**

Greasy and spicy food when, seasoned and presented nicely, immediately makes our mouth water. However no matter how delectable it looks, such food is very unhealthy. It is appealing to people, for it is convenient and tastes good; but the bitter truth is, it is rich in calories and has no nutritive value. A serious concern nowadays is the deteriorating health of young people and the primary cause of this is the consumption of junk food. Therefore it's high time we junk the junk food. It has been demonstrated many times that excessive consumption of this unhealthy food leads to harmful effect. In the last two decades, their consumption has increased considerably. Children, these days, indulge in unhealthy food habits and prefer to have only junk food.

Consumption of pizzas, burger, noodles, French fries and aerated drinks leads to various health issues like obesity, diabetes, depression and nutrients deficiencies. Today obesity has become a very common problem among youngsters and kids. Children do not relish green vegetables and prefer to have processed food only. Undoubtedly junk food taste good, but it results in weight gain and make us lethargic. Obesity in the long run may also lead to heart diseases.

These unhealthy calories increase the sugar level in the body, and could result in diabetes. People who eat junk food frequently may complain of high blood pressure, develop sleep disorders and have less attention span (especially children). This doesn't help them focus and affects their memory too. The processed oil and synthetics chemicals used in junk food affects the digestive system as well. The continuous accumulation of these chemicals in various body parts may turn cancerous in nature with the passage of time. For the sake of one's own good health, it is better to avoid consumption of the junk food.

**On the basis of reading of the above passage answer the following questions by choosing the most correct options.**

10) Obesity has become common problem in which age group?

- a) Adults      b) Youngsters      c) Old people      d) Infants

**Q2. Read the following passage carefully.**

**(1x10=10 marks)**

Since ages camel is a reliable source of men and material carrier in the deserts of India as well as abroad. None other than the camel can win the honour of the tourism industry, due to its weather friendly nature and food intake quality approach. The camel is the oldest of domestic animals. It has been used for thousands of years, by the desert people of Africa and Asia to supply many of their needs. On the fertile edges of the desert, camels pull ploughs, turn wheels to irrigate the fields and carry goods to the market. In the desert itself, they are still almost the only means of transport. They supply food, milk and clothing in the form of wool and leather.

This useful animal is well adapted to life in harsh, arid lands. The Arabian camels have one hump; the Bactrian camel has two. The hump is, in fact, a store of fat which is used as a source of energy when food and water are scarce. In course of drinking, the camel is capable of drinking 100 litres of water in ten minutes.

The camel has broad, soft feet for steady grip in the sand. A thick skin protects it from the fierce daytime sun and bitterly cold nights. Often called 'The ship of the desert', they can carry loads of 200 kilos and

more, travelling up to 160 kilometers a day. Camels eat grass, dates and grain when available. Deep in the desert they survive on dry leaves and seeds.

**On the basis of reading of the passage complete the sentences choosing the correct option:**

- 1) According to the passage, the camel is .....
  - a) used to plough the field.
