

## Life Process (II)

### Transpiration and Excretion

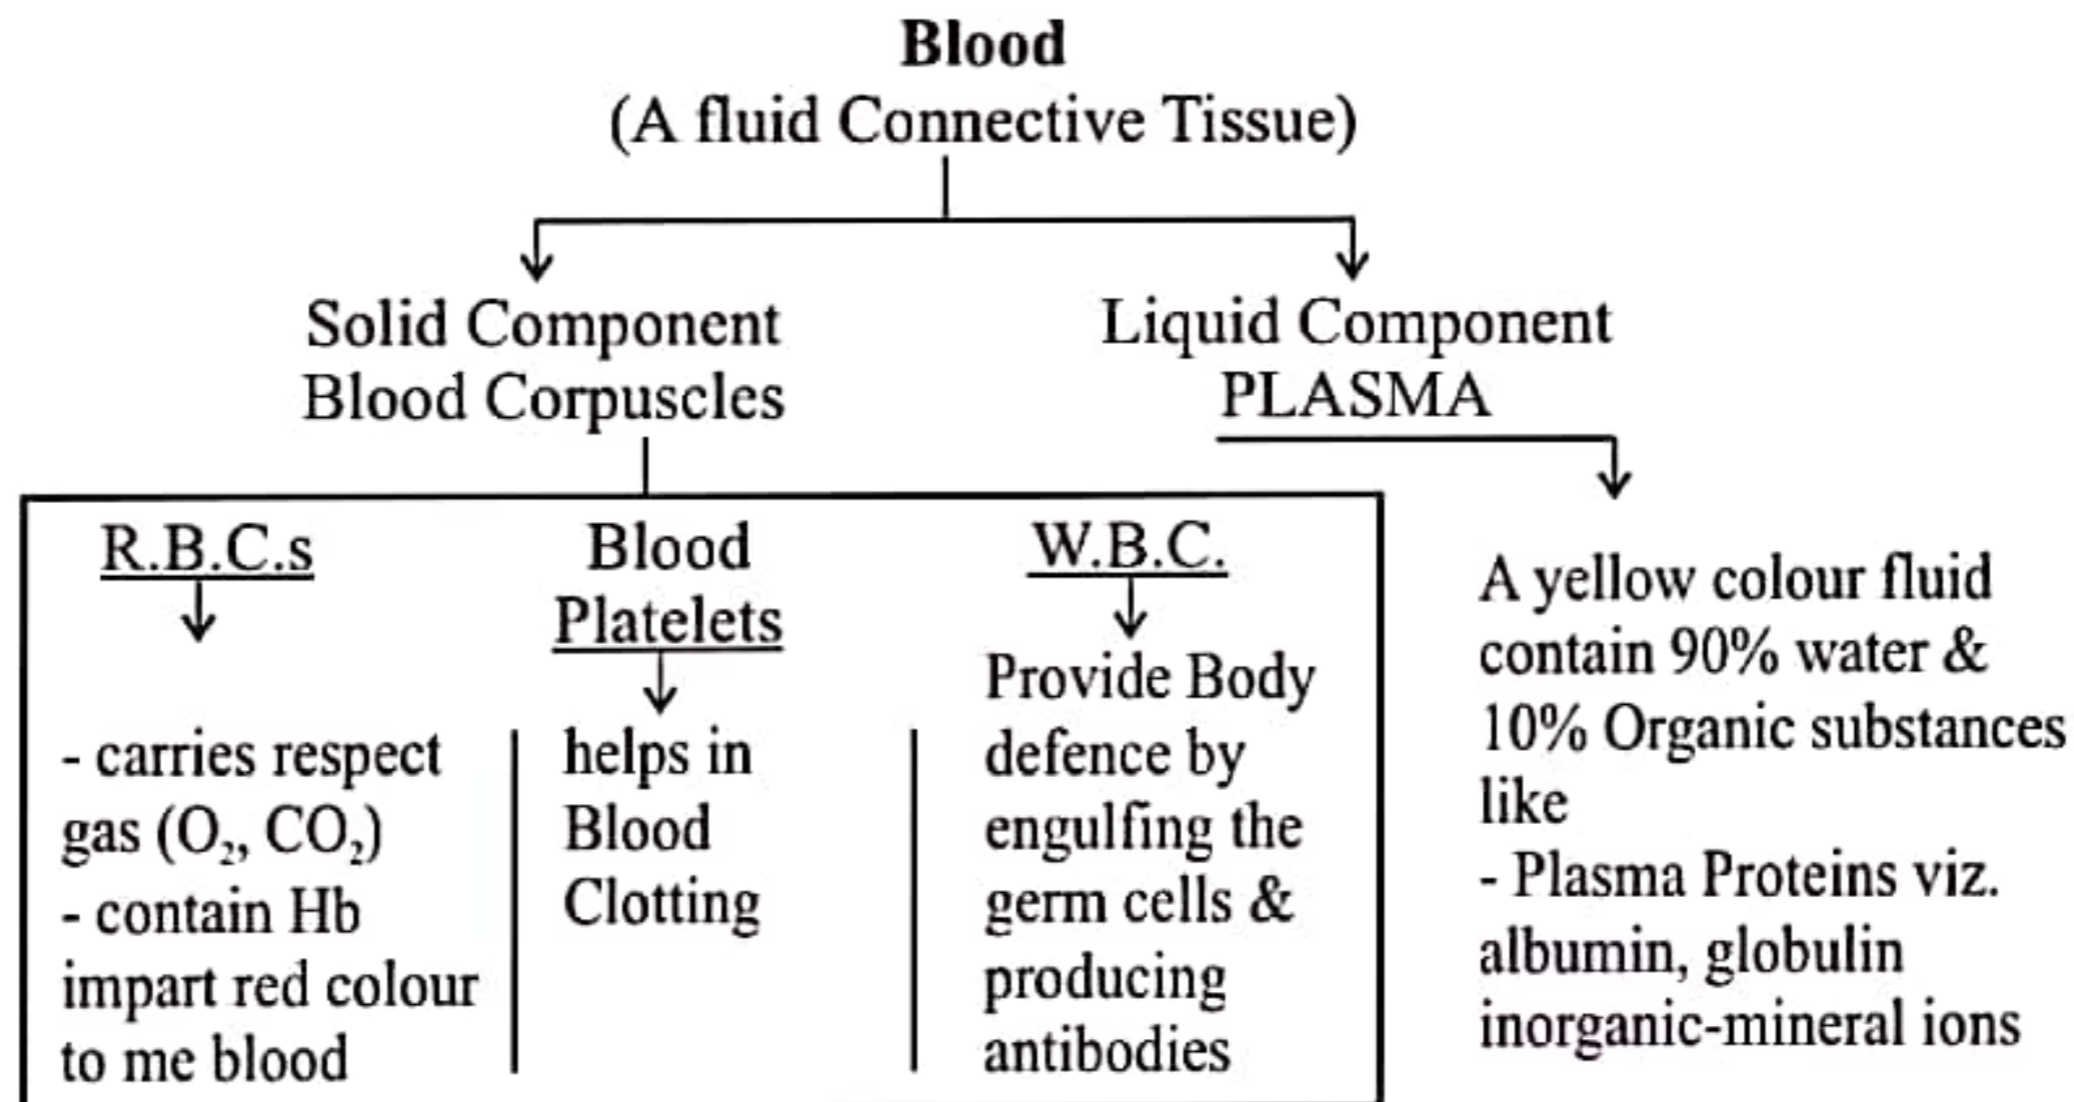

- Human beings like other multicellular organism need regular supply of food, oxygen etc., This function is performed by circulatory system or Transport system.
- The circulatory system in human beings consists of:

The circulatory system in human beings consists of :

Left Ventricle (contracts) ← Left Ventricle (relaxed) ← Left Atrium (contracts) ← Left Atrium (relaxed) ← Oxygenated blood

- Lymph - a yellowish fluid escapes from the blood capillaries into the intercellular spaces contain less proteins than blood. Lymph flows from the tissues to the heart assisting in transportation and destroying germs.

### Blood Vessels
