

O P JINDAL SCHOOL, SAVITRINAGAR

ASSIGNMENT

CLASS X PHYSICS

- 1 An object is placed at a distance of 0.25 m in front of a plane mirror. The distance between the object and image will be
(a) 0.25 m (b) 1.0 m
(c) 0.5 m (d) 0.125 m
- 2 The angle of incidence for a ray of light having zero reflection angle is
(a) 0 (b) 30°
(c) 45° (d) 90°
- 3 For a real object, which of the following can produce a real image?
(a) Plane mirror (b) Concave mirror
(c) Concave lens (d) Convex mirror
- 4 Which of the following mirror is used by a dentist to examine a small cavity?
(a) Convex mirror
(b) Plane mirror
(c) Concave mirror
(d) Combination of convex and concave mirror
- 5 An object at a distance of 30 cm from a concave mirror gets its image at the same point. The focal length of the mirror is
(a) – 30 cm (b) 30 cm
(c) – 15 cm (d) +15 cm
- 6 An object at a distance of +15 cm is slowly moved towards the pole of a convex mirror. The image will get
(a) shortened and real
(b) enlarged and real
(c) enlarge and virtual
(d) diminished and virtual
- 7 A concave mirror of radius 30 cm is placed in water. It's focal length in air and water differ by
(a) 15 (b) 20
(c) 30 (d) 0
- 8 A concave mirror of focal length 20 cm forms an image having twice the size of object. For the virtual position of object, the position of object will be at

- (a) 25 cm (b) 40 cm
- (c) 10 cm (d) At infinity

9 The image formed by concave mirror is real, inverted and of the same size as that of the object. The position of object should be

- (a) at the focus
- (b) at the centre of curvature
- (c) between focus and centre of curvature
- (d) beyond centre of curvature

10 The nature of the image formed by concave mirror when the object is placed between the focus (F) and centre of curvature (C) of the mirror observed by us is

- (a) real, inverted and diminished
- (b) virtual, erect and smaller in size
- (c) real, inverted and enlarged
- (d) virtual, upright and enlarged
